

Dear Hiring Team at CGI,

As a master's student in Applied Computer Science at Dalhousie University with a solid foundation in software development and a passion for solving complex problems, I am excited to apply for the Summer 2025 Internship position at CGI. With hands-on experience in building scalable applications and a deep interest in digital transformation, I am eager to contribute to CGI's innovative projects and global impact.

During my tenure as a Mobile Application Developer at Simform Solutions, I engineered end-to-end solutions for Android and iOS platforms, optimizing performance by 40% and ensuring seamless user interactions. My work with Agile methodologies and the SDLC has enabled me to deliver high-quality software, whether it's integrating APIs, enhancing data security, or creating modular, maintainable codebases. These experiences align closely with CGI's emphasis on delivering cutting-edge solutions in areas like cloud services, data analytics, and process automation.

In addition to my professional background, my academic journey has sharpened my problem-solving and analytical skills. For instance, while developing SpendWise, a mobile app for expense tracking, I leveraged Kotlin and Room Database to ensure data integrity and user-friendly interfaces. Similarly, my exploration of cloud services like AWS and Azure has broadened my technical proficiency, positioning me to contribute to CGI's mission of delivering world-class IT consulting and solutions.

What excites me most about this role is CGI's unique culture of ownership and collaboration. The prospect of working alongside a diverse, talented team while contributing to impactful projects resonates deeply with my values and career aspirations. I am particularly drawn to CGI's commitment to inclusion and professional development, which I believe will help me grow both personally and professionally.

I am confident that my technical expertise, coupled with my passion for innovation and teamwork, makes me a strong fit for CGI's internship program. I look forward to the opportunity to contribute to your team and learn from the incredible talent at CGI.

Thank you for considering my application. I would be delighted to discuss how my skills and experiences align with CGI's goals.

Best regards,

Vraj Shah
