

Dear Hiring Team at Teck Resources Limited,

The opportunity to join Teck as a Software Development Co-op is an exciting prospect that aligns perfectly with my academic background and passion for creating impactful solutions. As a Master of Applied Computer Science student at Dalhousie University with two years of professional experience in mobile application development, I am eager to bring my technical expertise and commitment to innovation to your team.

During my tenure as a mobile application developer, I worked extensively with both frontend and backend technologies, using languages like Kotlin, Swift, and JavaScript. I developed user-focused features, optimized application performance, and collaborated closely with cross-functional teams to deliver high-quality products. My academic projects have further enhanced my skills in data analysis using SQL and my understanding of cloud platforms like Azure. These experiences align closely with the responsibilities outlined in this role, such as supporting Azure migration, backend development, and data analysis.

What excites me most about this co-op opportunity is Teck's dedication to fostering young talent and its commitment to sustainability. The prospect of contributing to meaningful projects in a collaborative and inclusive environment resonates deeply with my professional values. Additionally, the chance to work in Calgary, with its blend of urban energy and natural beauty, makes this opportunity even more appealing.

I am particularly drawn to Teck's emphasis on mentorship and professional development, as I am a self-starter who thrives in learning environments. My ability to quickly adapt to new technologies, coupled with my strong problem-solving skills and experience working in agile teams, positions me to make a valuable contribution to your team.

Thank you for considering my application. I look forward to the possibility of discussing how my skills and experiences align with Teck's goals and how I can contribute to the success of your organization.

Best regards,

Vraj Shah
