Hiring Team

Aviva

**Subject:** Application for Summer Intern - Software Engineering

Dear Aviva Hiring Team,

I'm excited to apply for the Software Engineering summer internship at Aviva Canada. As a master's student in Applied Computer Science at Dalhousie University with two years of professional experience developing native Android and iOS applications, I am eager to bring my passion for problem-solving and clean code to your innovative IT team.

In my previous roles, I developed robust mobile applications using **Kotlin** and **Swift**, focusing on seamless user experiences and efficient back-end integration. My strong foundation in **object-oriented programming, APIs, and software architecture** allows me to adapt quickly to various development environments. I am proficient in **Java, Python, and C++**, all of which align well with your requirements for this role. Beyond technical skills, I have a knack for debugging complex issues and a passion for writing scalable, maintainable code.

What excites me most about Aviva is the company's commitment to innovation in the insurance industry. I am particularly drawn to the prospect of collaborating with senior engineers, contributing to meaningful projects, and enhancing my development skills in a dynamic environment. I thrive in fast-paced settings and value teamwork, both of which I understand are key to succeeding at Aviva.

I would be thrilled to bring my coding experience, problem-solving mindset, and enthusiasm to your team this summer. Thank you for considering my application. I look forward to the opportunity to connect and share how I can contribute to Aviva's success.

Sincerely,

Vraj Shah
