Hiring Team

Content Bloom

**Subject:** Application for **Co-op, Junior Technical Consultant**

Dear Gala Vasylitsev,

I am excited to apply for the Junior Technical Consultant position at Content Bloom for the Summer 2025 term. As a master's student in Applied Computer Science at Dalhousie University with two years of professional software development experience, I am eager to bring my technical expertise and collaborative mindset to contribute to your innovative digital solutions.

During my time at Simform Solutions, I designed and implemented scalable software solutions, optimizing system performance by 40% through efficient backend development with Kotlin and Spring Boot. Collaborating closely with cross-functional teams, I honed my skills in agile development, technical documentation, and problem-solving. One of my key projects involved architecting a service hub platform that streamlined user interactions and enhanced engagement by 20% through secure contract management and real-time workflows.

Beyond development, I thrive in roles that require proactive problem-solving and effective communication—traits essential for technical consulting. My experience with CMS platforms and model-view-controller patterns aligns well with the requirements of this role. I am particularly drawn to Content Bloom's commitment to delivering exceptional digital experiences and would relish the opportunity to contribute to your enterprise-level solutions for Fortune 500 clients.

I would welcome the chance to discuss how my background and enthusiasm for backend development can contribute to Mercury's innovative solutions. Thank you for your time and consideration.

Thank you for your time and consideration.

Looking forward to the possibility of contributing to Content Bloom's success.

Sincerely,

Vraj Shah
