Hiring Team

**Verily**

**Subject:** Application for **Software Developer Intern, Precision Health Platform**

Dear Verily Hiring Team,

Innovating at the intersection of technology, data science, and healthcare is where I aspire to make a difference, and Verily's vision of precision health aligns perfectly with my ambitions. With a strong foundation in computer science and a passion for leveraging technology to transform healthcare, I am excited about the opportunity to contribute as an intern on the Precision Health Platform engineering team.

Currently pursuing a master's in applied computer science at Dalhousie University, I bring two years of professional experience developing mobile applications for Android and iOS using Kotlin and Swift. My expertise lies in designing modular, user-centric applications, a skill that resonates with Verily's focus on creating composable and interoperable components for precision health data. Beyond mobile development, I have hands-on experience with cloud platforms like Google Cloud and AWS, enabling me to design scalable and efficient solutions.

My journey into software development has been driven by a deep interest in applying technology to solve real-world problems. As a graduate student, I have further refined my problem-solving skills through projects such as developing secure data management systems, enhancing my ability to analyse complex design challenges and propose innovative solutions.

What excites me most about Verily is the opportunity to work alongside a multidisciplinary team and make meaningful contributions to products that improve health outcomes. The use of tools like Go, React, and Terraform to tackle cutting-edge challenges motivates me to bring my collaborative spirit, adaptability, and coding expertise to your team.

I am particularly inspired by Verily's commitment to diversity and inclusivity. As someone who thrives in diverse environments, I deeply value how Verily fosters a culture where individuals from various backgrounds come together to drive impactful change.

Thank you for considering my application. I would be thrilled to bring my technical skills and enthusiasm to Verily and contribute to advancing the promise of precision health. I look forward to the possibility of discussing how I can be an asset to your team.

Sincerely,

**Vraj Shah**
