Hiring Team

Travelers

Subject: Application for Software Programmer Summer Intern

Dear Travelers Hiring Team,

I am excited to apply for the Information Technology Co-Op position at Travelers Canada. As a master's student in Applied Computer Science at Dalhousie University with a strong foundation in software engineering and problem-solving, I am eager to contribute to the innovation and success of Travelers while gaining invaluable industry experience.

With over two years of experience developing native Android and iOS applications using Kotlin and Swift, I have honed my technical skills in programming, debugging, and creating seamless user experiences. My coursework in data structures, algorithms, and software architecture has further enhanced my ability to analyse complex processes and design efficient solutions—skills that align with the Co-Op's emphasis on process analysis and automation.

What excites me most about this opportunity is Travelers' commitment to developing future leaders through meaningful projects and hands-on training in technologies such as Python and ETL. In my previous academic and professional roles, I have worked on integrating APIs, optimizing workflows, and automating repetitive tasks to improve efficiency and accuracy. For instance, I developed an automation feature in a mobile app that reduced manual intervention by 30%, a project that mirrors the goals of this Co-Op program.

Beyond technical expertise, I bring strong analytical and communication skills. Collaborating with cross-functional teams has taught me to adapt quickly, identify root causes of challenges, and deliver impactful solutions—all while ensuring clear and effective documentation. These qualities, combined with my passion for continuous learning, make me a strong fit for this role and an asset to the Travelers team.

I am particularly drawn to Travelers' dedication to creating a supportive and inclusive workplace where employees are empowered to make a difference. Joining your team would not only allow me to apply my skills but also enable me to contribute to the innovative solutions that drive your success in the insurance industry.

Thank you for considering my application. I am eager to bring my technical expertise, enthusiasm, and drive to Travelers and look forward to the opportunity to discuss how I can contribute to the success of your Co-Op program.

Sincerely,
Vraj Shah
