

Dear Hiring Team at immediaC,

As a second year master's student in Applied Computer Science at Dalhousie University and an experienced mobile and web developer, I am thrilled about the opportunity to join immediaC's applications development team. With your 20-year legacy of crafting intelligent, impactful solutions, I am eager to contribute to your mission of building great software for industry, government, and nonprofits across Canada.

In my two years of professional experience, I developed native Android and iOS applications using Kotlin and Swift, focusing on delivering clean, user-centric designs. Collaborating with cross-functional teams, I've honed my skills in problem-solving and creating scalable solutions. For example, I worked on a project to integrate a secure registration system for a mobile app, mirroring immediaC's expertise in credentialing and membership management systems. My technical proficiency extends to Java, Kotlin, Swift and JavaScript, making me well-prepared to tackle the responsibilities outlined in this role.

What excites me most about this position is immediaC's collaborative and innovative environment. The opportunity to contribute to the design, coding, and testing of cloud-based CRMs and web applications aligns perfectly with my academic background and passion for software development. Additionally, your emphasis on fostering open discussion and teamwork resonates with my own values of learning and collaboration.

Beyond my technical abilities, I bring enthusiasm, creativity, and a strong desire to contribute to meaningful projects. Whether brainstorming technical solutions with peers or ensuring robust technical documentation, I strive to create impactful work that aligns with client needs and organizational goals.

Joining immediaC represents an exciting opportunity to grow alongside a passionate team while contributing to the development of intelligent solutions that make a difference. Thank you for considering my application. I would love the opportunity to discuss how my skills and experiences align with your team's goals.

Best regards,

Vraj Shah
