

Dear Hiring Team at Hatch,

I am excited to apply for the Junior Software Developer Co-op position at Hatch for the May 2025 term. With my passion for innovative software development and my commitment to creating meaningful solutions, I am eager to contribute to your team's goal of building safe, sustainable, and practical technologies.

As a master's student in Applied Computer Science at Dalhousie University, I have developed a strong foundation in agile software development and full-stack engineering. Through academic projects and previous internships, I have gained experience with Java, Kotlin, Swift, Javascript, and SQL Server, as well as front-end frameworks like React, Jetpack Compose and SwiftUI. For instance, in a recent team project, I collaborated to design and implement a web application that streamlined data visualization for a business client, leveraging REST APIs and Microsoft Azure for seamless integration and scalability.

Hatch's commitment to sustainability and global collaboration resonates deeply with me. I value the opportunity to work in Agile teams, participate in meaningful projects, and grow alongside diverse professionals. My strong organizational skills, problem-solving abilities, and enthusiasm for embracing change position me to thrive in the dynamic environment you offer.

Moreover, I am particularly drawn to Hatch's dedication to mentorship and innovation. Your emphasis on fostering growth through Lunch and Learns, triannual showcases, and collaborative initiatives aligns perfectly with my goal of continuously expanding my technical expertise while contributing to impactful projects.

I am confident that my blend of technical proficiency, creativity, and teamwork will enable me to deliver valuable contributions to Hatch's projects. I am eager to further discuss how my skills and experiences align with this exciting opportunity.

Thank you for considering my application. I look forward to the possibility of contributing to Hatch's mission of bettering industries and communities worldwide.

Best regards,

Vraj Shah
