Hiring Team

Solink

Subject: Application for **R&D Co-Op - Jr Developer**

Dear Anakin Skywalker,

I am writing to express my interest in the **Junior Developer Intern** position at Solink. As a graduate student at Dalhousie University pursuing my master's in applied computer science, I am eager to contribute to your innovative team. My experience in **full-stack development**, **front-end frameworks**, and **version control systems** like **Git** makes me confident that I can be an asset to Solink's R&D team.

In my recent projects, I have gained proficiency in **TypeScript**, **React**, and **Node.js**, and I have applied these skills to build robust, scalable applications. I have also worked with **REST APIs** and am familiar with **SQL** and **NoSQL** databases, giving me a well-rounded understanding of both front-end and back-end components. I am particularly drawn to this opportunity because of Solink's mission to revolutionize video security and its creative, fast-paced work environment, which aligns perfectly with my drive for continuous learning and growth.

I am excited about the opportunity to work alongside experienced developers and contribute to impactful projects, all while refining my skills in a collaborative setting. I believe my problem-solving abilities, strong communication skills, and passion for technology will allow me to make meaningful contributions to your team.

Thank you for considering my application. I look forward to the opportunity to discuss how my skills and experiences align with the needs of your team.

Sincerely,

Vraj Shah
