Hiring Team

DV Group

Subject: Application for **2025 Summer Internship - Trading**

Dear Hiring Team,

Trading has always fascinated me—the fast-paced decision-making, strategic model development, and continuous learning it demands. With a background in Computer Science and experience in data-driven problem-solving, I am eager to bring my analytical skills to DV Trading as a Summer Trading Intern in Toronto.

Currently pursuing my Master of Applied Computer Science at Dalhousie University, I have honed my proficiency in Python and SQL through projects involving cloud technology and data management. My experience developing Android and iOS applications has strengthened my ability to optimize processes and implement efficient algorithms. Additionally, my coursework in Data Management and Warehousing has deepened my understanding of handling large datasets—an essential skill in trading.

Beyond academics, my experience working with real-time systems has reinforced my ability to analyze discrepancies, identify optimization opportunities, and maintain accuracy under pressure. I thrive in high-intensity environments and am eager to apply my quantitative and programming skills to contribute meaningfully to DV Trading's strategies.

I am excited about the opportunity to learn from experienced traders and refine my approach to market analysis and strategy development. I look forward to the possibility of discussing how my skills and passion align with DV Trading's objectives. Thank you for your time and consideration.

Sincerely,

Vraj Shah
