Hiring Team

Nakisa

Subject: Application for **Software Developer Intern**

Dear Hiring Team,

Creating meaningful software that powers Fortune 1000 companies is a mission I deeply resonate with. With two years of hands-on experience in software development and a passion for writing clean, scalable, and efficient code, I am excited to apply for the Software Developer Intern position at Nakisa. Your dedication to innovation and fostering a diverse, collaborative environment aligns perfectly with my professional values.

At Simform Solutions, I developed robust software solutions for customer-facing applications by designing and implementing microservices using Spring Boot and Kotlin. I collaborated closely with cross-functional teams to deliver fault-tolerant services that improved system efficiency by 40%. My experience with test-driven development has allowed me to produce reliable code while maintaining high standards in software quality. Additionally, I have experience deploying cloud-native applications using Docker and Kubernetes, enabling seamless CI/CD operations.

Currently, I am pursuing a Master of Applied Computer Science at Dalhousie University, where my coursework has strengthened my understanding of object-oriented design principles, data structures, and agile methodologies. One of my recent projects involved developing a full-stack application using Spring Boot and React, further cementing my passion for crafting seamless user experiences through backend excellence.

I am inspired by Nakisa's commitment to delivering innovative solutions and fostering an inclusive culture. I thrive in fast-paced, agile environments where creativity and collaboration fuel success. With a problem-solving mindset and a passion for learning, I am confident that I can contribute meaningfully to your development efforts and help build the next generation of impactful software solutions.

Thank you for your time and consideration. I would love the opportunity to further discuss how my experience and passion for software development align with Nakisa's mission.

Sincerely,
Vraj Shah
