

Dear Hiring Team at BMO,

At the heart of innovation and meaningful change lies collaboration—and I'm excited about the opportunity to contribute my skills and enthusiasm to BMO's mission of "Boldly Growing the Good." As a Master's student in Applied Computer Science at Dalhousie University with a passion for problem-solving and software development, I am eager to bring my technical expertise and growth mindset to your team.

In my academic journey, I have gained hands-on experience in programming, systems development, and cloud computing through coursework and self-driven projects. Regular practice on platforms like HackerRank and LeetCode has sharpened my skills in Kotlin, Java, and other languages, ensuring I'm prepared to tackle complex challenges. Beyond technical skills, I thrive in collaborative environments, where teamwork transforms ideas into impactful solutions—a core value I admire in BMO's culture.

What excites me most about this opportunity is the chance to contribute to impactful projects while participating in initiatives like the BMO Social Squad and Women in Technology Mentorship Program. These programs demonstrate BMO's commitment to nurturing talent and fostering diversity, which align perfectly with my values.

Through my programming experience and problem-solving mindset, I am confident in my ability to support your team in designing, testing, and implementing software solutions that meet both user and business needs. Moreover, my adaptability and eagerness to learn ensure that I can quickly integrate into the dynamic and innovative environment at BMO.

I would be thrilled to contribute to BMO's legacy of driving positive change while gaining invaluable experience to further my career. Thank you for considering my application. I look forward to the possibility of discussing how I can add value to your team.

Best regards,

Vraj Shah
