Hiring Team

Euna Solutions

Subject: Application for **Software Developer Co-op**

Dear Hiring Team,

Innovation thrives where curiosity and collaboration intersect, and that's exactly what draws me to Euna Solutions. With a strong foundation in software development and a passion for solving real-world challenges, I am eager to contribute my skills to your Procurement team as a Software Developer Co-op. The opportunity to work across the full development stack while enhancing software solutions for public sector clients aligns perfectly with my experience and aspirations.

Currently pursuing a Master of Applied Computer Science at Dalhousie University, I have developed expertise in both front-end and back-end development. My experience includes working with technologies like Kotlin, Swift, and SQL, complemented by a deep understanding of cloud environments such as Firebase. In a recent project, I developed an iOS and macOS application where the macOS app utilized PhotogrammetrySession to generate 3D models from images captured by the iOS app, showcasing my ability to integrate cutting-edge technologies to build impactful solutions.

Beyond technical proficiency, I value teamwork and knowledge sharing. As a contributor to the `Android_Project_Setup` open-source project, I automated dependency injection boilerplate code using Cookiecutter, streamlining workflows for fellow developers. Additionally, my familiarity with agile methodologies and tools like JIRA and GitHub Actions ensures that I can effectively collaborate in a fast-paced, iterative development environment.

Euna Solutions' mission to empower public sector organizations resonates with my desire to create technology that drives efficiency and transparency. With a keen eye for problem-solving and an eagerness to learn, I am excited about the prospect of tackling real-world customer challenges alongside a team that values innovation and collaboration.

I would welcome the opportunity to discuss how my skills and enthusiasm align with your team's goals. Thank you for your time and consideration—I look forward to the possibility of contributing to Euna Solutions.

Sincerely,
Vraj Shah
