

Dear Hiring team at Pinterest,

I am thrilled to apply for the Software Engineering Internship at Pinterest for Summer 2025. As someone who deeply admires Pinterest's mission of helping people find inspiration and create a life they love, I am excited about the opportunity to contribute to a platform that serves as a positive and creative corner of the internet.

As a master's student in Applied Computer Science at Dalhousie University, I have completed rigorous coursework in Data Structures, Algorithms, and Operating Systems, which has provided me with a solid foundation in computer science. Beyond academics, I have cultivated hands-on experience through SpendWise (personal project) and open-source contributions, where I developed an android application using Kotlin and local database (SQLite - Room) for user to track their expense efficiently.

Here's how I align with the requirements of this role:

- **Technical Proficiency:** I have experience coding in Java, Kotlin, Swift, Python, and JavaScript, and I am adept at leveraging data structures and algorithms to solve complex problems.
- **Collaborative Mindset:** In my previous projects, I have worked in cross-functional teams, effectively communicating ideas and contributing to innovative solutions.
- **Passion for Learning:** My curious nature drives me to constantly seek new challenges, as demonstrated by my participation in HackerRank and Leetcode platform.

What excites me most about this opportunity is Pinterest's PinFlex model, which fosters collaboration while embracing flexibility. The chance to interact with senior leaders and work on impactful projects resonates with my ambition to grow both technically and personally. I am particularly inspired by Pinterest's commitment to inclusivity and creativity, values I deeply share.

I am eager to bring my skills, enthusiasm, and problem-solving mindset to Pinterest while learning from and contributing to your talented team. Thank you for considering my application. I look forward to the possibility of discussing how I can help Pinterest build innovative solutions that inspire millions.

Best regards,

Vraj Shah
