Hiring Team

DoorDash

Subject: Application for **Software Engineer Intern**

Dear Hiring Team,

I am excited to apply for the Software Engineer Intern position at DoorDash. As a current master's student in Applied Computer Science at Dalhousie University with 2 years of hands-on experience in mobile and software development, I am eager to contribute to DoorDash's mission of building the world's most reliable on-demand logistics engine. With expertise in building scalable, secure applications and collaborating across teams to deliver user-centric solutions, I believe I am well-suited for this opportunity.

At Simform Solutions, I had the chance to work on a variety of projects that involved building high-performance, scalable Android and iOS applications using Kotlin, Jetpack Compose, and Swift. By optimizing code structures and adopting best practices, I significantly boosted app performance by 40% while enhancing user interactions and stability. I also played a pivotal role in building RESTful backend services using Spring Boot and MongoDB, ensuring secure and scalable data handling for high-traffic applications. These experiences have strengthened my ability to build robust systems and collaborate with cross-functional teams to deliver solutions that directly impact customer experiences.

I am particularly drawn to DoorDash because of your commitment to creating scalable, performant technology that delights users, and I am excited about the opportunity to contribute to real-time, large-scale applications. During my internship, I look forward to developing, maintaining, and shipping features that will make a tangible impact on your global infrastructure. Additionally, I'm eager to learn from the talented engineers at DoorDash and participate in the collaborative culture that is central to your team.

I am excited about the opportunity to apply my skills in mobile development, backend services, and systems optimization to DoorDash's mission. I look forward to the opportunity to discuss how I can contribute to your team and gain valuable experience during the internship. Thank you for considering my application. I hope to hear from you soon.

Sincerely,

Vraj Shah
