

Dear Hiring Team at BDO Digital,

I am excited to apply for the Cloud Analyst Co-op/Intern position for May to August 2025. As a master's student in Applied Computer Science at Dalhousie University with hands-on experience in cloud technologies and a passion for delivering impactful solutions, I am eager to contribute to BDO Digital's mission of leveraging technology to drive client success.

During my tenure as a Software Engineer at Simform Solutions, I:

- Contributed to the development and optimization of scalable applications by integrating cloud solutions, streamlining operations, and enhancing user engagement.
- Collaborated with cross-functional teams to implement CI/CD pipelines and automated processes, improving deployment efficiency by 40%.
- Provided training and support for internal teams, enabling seamless adoption of cloud-based tools and workflows.

My academic projects have further honed my skills in cloud platforms such as AWS and Azure, as well as in subscription models and client onboarding processes. Specifically, I have designed tools to analyse cloud usage patterns, forecast costs, and optimize resource allocation—aligning closely with the responsibilities outlined for this role.

What excites me most about this opportunity is BDO Digital's commitment to fostering growth and innovation while maintaining a people-first approach. The chance to develop sales propensity models and support cloud operations resonates with my passion for combining technical expertise with business impact.

I am confident that my technical background, problem-solving mindset, and dedication to continuous learning make me a strong fit for this position. I am eager to bring my skills to BDO Digital and contribute to delivering exceptional client experiences.

Thank you for considering my application. I look forward to the opportunity to discuss how my background aligns with your team's goals.

Best regards,

Vraj Shah
