

Dear Hiring team at Cove,

I am thrilled to apply for the COVE Internship Program, particularly the opportunity to work with the JASCO Software Group. As a **master's student in Applied Computer Science at Dalhousie University**, I am eager to bring my technical expertise and enthusiasm for solving complex problems to the marine and marine technology sector.

My experience aligns closely with the requirements of this position:

- **Software Development Expertise:** My academic and personal projects have honed my skills in Python programming, SQL, and database management. I am adept at leveraging version control tools like Git and have experience working across Windows and Linux operating systems.
- **Data Handling & Optimization:** I have worked extensively with data storage and processing systems, optimizing workflows and developing automated solutions. For instance, I recently contributed to an academic project where I automated data analysis pipelines using Python, reducing manual efforts by over 30%.
- **Deployment of SpendWise Application:** I am currently working on deploying my Android application, **SpendWise**, to the Google Play Store. This financial management app simplifies expense tracking for users, reflecting my ability to conceptualize, design, and deploy user-centric solutions that address real-world challenges.
- **Problem-Solving & Team Collaboration:** In various projects, I have worked in multidisciplinary teams to design, test, and implement solutions. My ability to analyse requirements, meet deadlines, and communicate effectively has been key to ensuring successful outcomes.

What excites me most about this internship is the opportunity to enhance JASCO's data transfer and storage processes. The chance to work with technologies like cloud systems (AWS, Azure) and collaborate with experts in marine technology aligns perfectly with my career aspirations to develop impactful solutions at the intersection of data and technology.

The marine sector's rapid growth and COVE's dedication to fostering innovation resonate deeply with me. I am particularly drawn to the program's emphasis on professional development, mentorship, and networking, as I am eager to learn from seasoned professionals while contributing to meaningful projects.

Thank you for considering my application. I look forward to the possibility of joining the COVE Internship Program and contributing to JASCO's mission of advancing marine technology. I am excited to bring my skills, creativity, and dedication to your team and would welcome the opportunity to discuss my qualifications further.

Best regards,

Vraj Shah
