Hiring Team

Adaptiiv

Subject: Application for **Software Engineer**

Dear Hiring Team,

I am excited to apply for the Software Engineering Co-op position at Adaptiiv. With a strong foundation in software testing, automation, and desktop application development, I am eager to contribute to your mission of driving innovation in healthcare technology.

During my time as a Software Engineer at Simform Solutions, I honed my skills in C# and Python by developing and maintaining applications while ensuring robust software quality. I designed and executed unit tests using MSTest and NUnit, improving test coverage to 95% and significantly reducing post-deployment defects. Additionally, my experience in automation tools like Selenium WebDriver and Postman has strengthened my ability to identify and resolve performance issues efficiently.

Beyond my technical expertise, I thrive in collaborative environments where problem-solving and adaptability are key. My familiarity with Git version control, CI/CD workflows, and adherence to SOLID design principles allows me to contribute effectively to scalable and maintainable codebases.

I am eager to bring my passion for software quality assurance to Adaptiiv and contribute to your cutting-edge healthcare solutions. I welcome the opportunity to discuss how my skills align with your team's goals. Thank you for your time and consideration.

Sincerely,

Vraj Shah
