Hiring Team

Mobia Technology Innovations

Subject: Application for Co-op Jr. DevOps Engineer/Consultant

Dear Mobia's Hiring Team,

I am excited to submit my application for the Junior DevOps Engineer/Consultant position at MOBIA Technology Innovations. As a Master of Applied Computer Science candidate with 2 years of professional experience in developing scalable software solutions, I have cultivated a strong foundation in both development and automation. My hands-on experience with CI/CD pipelines, container orchestration using Kubernetes and Docker, and cloud platforms like AWS and GCP makes me confident in my ability to contribute effectively to your team.

At Simform Solutions, I had the opportunity to work on projects that required me to think critically and automate complex processes. For example, I implemented Python scripts that streamlined diagnostic procedures and automated parts of our deployment workflow, reducing manual intervention and increasing system efficiency. This experience has not only sharpened my technical abilities but also nurtured my inquisitive mindset and passion for continuous improvement—qualities that align well with MOBIA's core values.

I am particularly drawn to this role because of MOBIA's commitment to mentoring and professional development. The prospect of working alongside experienced team members and being exposed to cutting-edge DevOps tools such as Infrastructure as Code (Terraform) and advanced monitoring solutions like Datadog excites me. I pride myself on being adaptable and collaborative, and I am eager to contribute to both customer projects and internal automation initiatives that drive operational efficiency.

Beyond my technical skills, I bring a genuine passion for learning and a commitment to clear, effective communication. I enjoy collaborating with diverse teams to solve complex challenges, and I am dedicated to sharing knowledge to foster a culture of continuous improvement. I am confident that my background, combined with my enthusiasm for embracing new technologies, makes me a strong fit for the Junior DevOps Engineer/Consultant role at MOBIA Technology Innovations.

Thank you for considering my application. I look forward to the possibility of discussing how I can contribute to your team and help MOBIA achieve its strategic goals.

Sincerely,
Vraj Shah
