

Dear Mrs. Jennifer Yao,

The opportunity to contribute to the City of Edmonton's mission of building a thriving, sustainable, and welcoming community is both exciting and deeply aligned with my aspirations. As a Master's student in Applied Computer Science at Dalhousie University and an advocate for community-driven innovation, I am eager to bring my skills, passion, and collaborative spirit to your team.

During my academic and professional journey, I have gained hands-on experience in programming, data analysis, and problem-solving—skills that I believe would add value to your diverse programs and services. My experience includes conducting research using quantitative and qualitative methodologies, which has honed my analytical abilities and my proficiency with tools such as Google Workspace and other specialized software.

What excites me most about this role is the chance to engage in meaningful projects that impact Edmontonians' daily lives while expanding my understanding of public service. My ability to work independently while collaborating with multidisciplinary teams has been a cornerstone of my success, and I look forward to applying this approach to the dynamic environment within the City of Edmonton.

I am particularly inspired by your commitment to equity, diversity, reconciliation, and inclusion, values that I actively champion in my academic and personal endeavors. This role represents an incredible opportunity to contribute to a city-building mission while growing professionally within an environment that fosters innovation and community impact.

Thank you for considering my application. I would be thrilled to discuss how my skills, experiences, and dedication align with the goals of the City of Edmonton.

Best regards,

Vraj Shah
