Hiring Team

Ericsson

**Subject:** Application for **Developer Intern**

Dear Hiring Team,

I am excited to apply for the Developer Intern position at Ericsson. With hands-on experience in backend development, API design, cloud infrastructure, and automation, I am eager to bring my technical expertise and problem-solving skills to your high-performing engineering team. Currently, I am pursuing my Master of Applied Computer Science at Dalhousie University, where I am deepening my understanding of software development, cloud computing, and DevOps.

During my tenure as a Software Engineer at Simform Solutions, I:

- Optimized API response time by 30% through query optimization and caching, improving performance for 10,000+ users.
- Reduced deployment time by 50% by automating CI/CD pipelines using GitHub Actions, GitLab CI, and Maven.
- Enhanced system scalability by 40% by migrating 50+ microservices to Docker and Kubernetes, cutting infrastructure costs.
- Increased feature delivery speed by 15% by collaborating in Agile (Scrum/SAFe) teams to align business goals with technical execution.

I am proficient in Java (JDK 17+), Spring Boot, RESTful APIs, Docker, Kubernetes, Bash scripting, JSON/XML parsing, and test automation (JUnit, Mockito, JMeter). Additionally, my ability to work in Linux/Unix environments, coupled with my knowledge of networking and cloud platforms (AWS, GCP, Azure), aligns well with the technical requirements of this role.

What excites me about Ericsson is your commitment to leveraging cloud-native technologies and 5G network APIs. I am eager to contribute my skills while learning from experienced Solution Architects and Software Engineers to develop innovative, high-performance solutions.

I would welcome the opportunity to discuss how my background and skills align with this role. Thank you for your time and consideration—I look forward to the possibility of joining your team!

Sincerely,

Vraj Shah
