Hiring Team

ApplyBoard

Subject: Application for **Software Engineer Co-op**

Dear Hiring Team,

I am excited to apply for the Integration Software Engineering Co-op position at ApplyBoard. With a strong background in backend and mobile development, I am eager to contribute my skills to integrate ApplyBoard's platform with student information systems, streamlining the enrolment process for educational institutions worldwide.

During my tenure at Simform Solutions as a Software Engineer, I developed scalable Android and iOS applications, optimizing performance by 40% through efficient coding practices. My experience in integrating RESTful APIs and working with cloud platforms like AWS has enabled me to build robust, scalable solutions. I have also utilized system integration and data pipeline technologies, which align well with the role's requirements.

In addition to my technical expertise, I thrive in collaborative environments, having conducted code reviews and contributed to open-source projects. My passion for solving complex problems and optimizing system performance aligns with ApplyBoard's mission to revolutionize global student enrolment through technology.

I am eager to bring my problem-solving abilities and backend development experience to ApplyBoard's team. I would welcome the opportunity to discuss how my skills can contribute to your mission. Thank you for your time and consideration.

Sincerely,

Vraj Shah
