

Dear Hiring Team,

Innovation thrives at the crossroads of technology and creativity, and Nakisa's commitment to delivering forward-thinking enterprise business solutions truly resonates with me. The opportunity to work as a Software Developer Intern within a company that not only values innovation but also fosters diversity and unity is one, I am genuinely excited about.

As a Master of Applied Computer Science student with over two years of experience developing Android and iOS applications using Kotlin and Swift, I have honed my skills in designing efficient, testable, and user-focused solutions. My academic journey has equipped me with a strong foundation in object-oriented design, while my professional experience has taught me the value of agile methodologies and teamwork.

What draws me to Nakisa is the emphasis on building robust Java services and cloud-native applications. During my projects, I have worked extensively with Spring Boot, REST APIs, and Docker, which has prepared me to dive into the challenges of full-stack development and OOps methodologies. Beyond technical skills, my passion for solving complex problems and my proactive mindset make me confident in my ability to contribute meaningfully to Nakisa's Agile teams.

The opportunity to learn and grow alongside talented professionals at Nakisa excites me. I am eager to contribute to your mission of driving business success through innovative software solutions while continuing to enhance my technical and analytical skills.

I would love the chance to bring my experience and enthusiasm to your team this winter. Thank you for considering my application. I look forward to the opportunity to discuss how my skills and background align with Nakisa's goals.

Best regards,

Vraj Shah
