Hiring Team

Avanade

Subject: Application for **Intern - Cloud Engineering**

Dear Sara Monds,

I am excited to apply for the Intern Cloud Engineering position at Avanade. As a graduate student pursuing a master's in applied computer science at Dalhousie University, I am eager to leverage my academic background in technology, cloud, and infrastructure solutions to contribute to Avanade's mission of revolutionizing digital experiences for clients.

I am drawn to this role because of Avanade's innovative approach to integrating technology with creative solutions. My coursework and previous hands-on experience in cloud technologies, databases, and infrastructure management have equipped me with a solid foundation in understanding and solving real-world business challenges. My passion for technology and problem-solving drives my desire to contribute to projects that push boundaries and improve client outcomes.

During my time at Dalhousie, I have gained practical knowledge of cloud technologies, including the integration and deployment of services. Additionally, my work with systems testing, data management, and platform migration aligns with the responsibilities outlined for this internship. I am particularly interested in the opportunity to contribute to IT operations, support infrastructure deployment efforts, and assist in systems integration and user acceptance testing.

Moreover, I thrive in team-oriented environments where collaboration, critical thinking, and adaptability are key to success. My leadership experiences in academic and extracurricular settings have honed my communication skills and my ability to work under pressure, making me well-suited for the dynamic and fast-paced internship program at Avanade. I am excited about the opportunity to learn from experts in the field and contribute to impactful cloud engineering projects.

I would love to discuss how my skills and enthusiasm for technology can add value to Avanade's team. Thank you for considering my application. I look forward to the opportunity to further explore this exciting role.

Sincerely,

Vraj Shah
