Hiring Team

Traqspera

Subject: Application for Software Engineer Intern

Dear Traqspera Hiring Team,

Field data management is an exciting frontier, and Traqspera's innovative solutions stand out as a game-changer for businesses. The opportunity to contribute to your mission of streamlining operations and enhancing decision-making through technology is one I'm genuinely excited about.

As a master's student in Applied Computer Science at Dalhousie University, I bring two years of professional experience developing native Android and iOS applications. This hands-on experience with Kotlin and Swift has honed my ability to build efficient and user-friendly applications. Alongside my mobile development expertise, I've worked on web technologies, building projects using React for the front end and exploring back-end development with frameworks like Laravel. In addition to technical skills, here's how I align with your needs:

- **Front-End Development:** Proficient in React, I've created intuitive, responsive interfaces that prioritize user experience.
- **Back-End Knowledge:** My familiarity with PHP and Laravel enables me to design robust, scalable back-end solutions.
- **Agile Collaboration:** I thrive in agile teams, contributing effectively to sprints, stand-ups, and iterative feature development.
- **Problem-Solving:** Debugging and optimizing code has been a central part of my workflow, ensuring performance and reliability.

I also bring experience with Git for version control, basic knowledge of AWS services, and a commitment to learning and adapting quickly. Whether it's brainstorming new features, enhancing existing ones, or troubleshooting issues, I'm ready to jump in and make a meaningful impact.

Your offer of mentorship and a collaborative environment is a perfect match for my drive to grow as a developer. Joining Traqspera means contributing to projects that deliver real-world value while working alongside passionate professionals.

I'd love to discuss how my background and skills can contribute to your mission. Thank you for considering my application. I look forward to the possibility of joining your team.

Sincerely,
Vraj Shah
