Hiring Team

Solink

**Subject: Application for QA Co-op Intern**

Dear Anakin Skywalker,

I am writing to express my interest in the Junior QA Automation Engineer Co-op position at Solink for the Winter 2025 term. As a graduate student pursuing a Master of Applied Computer Science at Dalhousie University, I am excited about the opportunity to contribute my skills in automated testing, performance optimization, and continuous integration to your dynamic team. With a solid foundation in **test automation frameworks** such as **Selenium**, **Appium**, and **Playwright**, along with experience in **CI/CD pipelines**, I am confident that my expertise would be an asset to Solink.

During my time at Simform Solutions, I developed and maintained **automated test suites** for mobile applications, leveraging tools like **Selenium WebDriver**, **Appium**, and **Postman** to ensure the highest quality of products. I also integrated automated testing into **CI/CD pipelines** using **GitLab CI** and **Jenkins**, which improved deployment efficiency and reduced downtime. In addition to my strong automation skills, I have experience with **performance testing** using **JMeter**, which I believe would help ensure the robustness and scalability of Solink's applications.

I am particularly drawn to Solink's mission to transform conventional data into actionable insights through video and data analytics. Your innovative work in leveraging video security for loss prevention and operations is inspiring, and I am eager to contribute to a team that is passionate about solving complex data problems. The collaborative environment at Solink, coupled with the opportunity to work with cutting-edge technologies, excites me. I am eager to apply my skills in automation and QA processes to support your development teams and help drive the success of your products.

As a strong communicator and quick learner, I am confident in my ability to collaborate effectively with both technical and non-technical teams. I thrive in fast-paced environments and take ownership of my work, always seeking innovative solutions to problems. My background in **QA methodologies**, along with my hands-on experience with tools such as **Jenkins**, **AWS**, and **Linux**, make me a well-rounded candidate for this role.

I am looking forward to the opportunity to discuss how my skills and experiences align with the needs of your team. Thank you for considering my application. I am excited about the possibility of contributing to Solink's continued growth and success. Please feel free to contact me to schedule an interview.

Sincerely,  
Vraj Shah
