Dear Hiring Team at Dayforce,

I am thrilled to apply for the Mobile Team Intern position at Dayforce for the Summer 2025 term. The opportunity to contribute to the launch of Flex Work, an innovative on-demand marketplace, aligns perfectly with my passion for creating impactful mobile applications that enhance user experiences and drive efficiency.

As a master's student in Applied Computer Science at Dalhousie University, I bring a strong foundation in software development practices, with hands-on experience in Kotlin and Swift for building native Android and iOS applications. My two years of professional experience in mobile development have honed my skills in defect tracking, functional testing, and delivering seamless user experiences. I am particularly excited about collaborating with your team to develop and test apps from the ground up, utilizing tools like Appium for automation and ensuring compatibility across platforms.

What excites me most about this role is the chance to work on a product that redefines work-life dynamics, empowering individuals while addressing talent needs for businesses. Dayforce's commitment to fostering innovation and its focus on employee well-being resonate deeply with me. I am eager to bring my problem-solving abilities, adaptability to fast-paced environments, and enthusiasm for technology to contribute meaningfully to your mission of "Making Work Life Better™."

I look forward to the possibility of joining Dayforce and leveraging my skills to support the successful launch of Flex Work. Thank you for considering my application. I would be delighted to discuss how my background aligns with your team's goals.

Best regards,
Vraj Shah
