Hiring Team
Coalition

Subject: Application for Frontend Engineer Intern

Dear Coalition Hiring Team,

I was excited to come across the Software Engineering Intern opportunity at Coalition. With two years of experience developing scalable Android and iOS applications and contributing to full-stack SaaS solutions, I bring a passion for solving complex problems and building secure, user-centric software. The prospect of joining a mission-driven company focused on preventing digital risks is particularly inspiring to me.

In my previous role at Simform Solutions, I took ownership of end-to-end development for enterprise-level mobile and backend applications. I designed and implemented scalable backend services using Spring Boot and Kotlin, achieving a 40% performance improvement. I thrive in collaborative environments, actively participating in Agile ceremonies and contributing to code reviews that reduced technical debt by 40%. My experience developing secure and resilient systems aligns well with Coalition's focus on tackling real-world problems in a fast-paced environment.

What excites me most about Coalition is your commitment to mentorship and fostering a culture of growth. I'm eager to contribute to impactful projects while learning from senior technical leaders. My experience in solving complex technical challenges and eagerness to embrace new technologies make me a strong fit for your dynamic team.

Thank you for considering my application. I would love to discuss how my skills and enthusiasm align with Coalition's mission. I am available for an interview at your convenience and look forward to the opportunity to contribute to your exciting projects.

Looking forward to hearing from you.

Sincerely,
Vraj Shah
