Subject: Application for Digital Technology Consultant - CGI Co-op for Good Program

Dear Michael Goudreault,

The CGI COOP for Good Program is an inspiring initiative, combining technology consulting with meaningful community impact. The opportunity to work with the Millbrook First Nation, contribute to their thriving economic development, and be part of CGI's global network aligns perfectly with my passion for leveraging technology to create meaningful change.

As a Master of Applied Computer Science student at Dalhousie University, I bring two years of professional experience developing Android and iOS applications using Kotlin, Swift, and modern frameworks like Jetpack Compose and SwiftUI. My technical background in software development, paired with a strong foundation in problem-solving and data-driven decision-making, equips me to excel in gathering business requirements, delivering innovative software solutions, and driving process automation.

Beyond technical skills, I deeply value the chance to support Indigenous communities and am eager to contribute to the Millbrook First Nation's ongoing success. Having studied Indigenous history in Canada, I recognize the importance of respectful collaboration and the potential for technology to amplify community-driven initiatives.

In addition, my proficiency with tools like MS Office 365 and Agile methodologies ensures that I can effectively manage the Software Development Lifecycle while maintaining clear communication and strong teamwork. I'm confident that my technical expertise, combined with a genuine commitment to community engagement, will allow me to thrive as a Digital Technical Consultant within this unique program.

I am excited about the possibility of joining CGI's COOP for Good Program and contributing to impactful projects that benefit both the community and the region. I would welcome the opportunity to discuss how my skills and experiences align with this role.

Thank you for considering my application. I look forward to the chance to learn more about CGI, the program, and how I can contribute to its success.

Sincerely,
Vraj Shah
