Hiring Team
Rakuten

Subject: Application for **Software Engineer Server/Full Stack - Intern**

Dear Hiring Team,

I'm reaching out to express my keen interest in the Software Engineer Server/Full Stack - Intern position at Rakuten Rewards. As an aspiring mobile developer currently pursuing a master's in applied computer science at Dalhousie University, I have developed a strong foundation in building high-performance, user-friendly applications. What excites me about this opportunity is the chance to work on innovative, consumer-facing product launches and feature enhancements that have a direct impact on Rakuten's mission to revolutionize the shopping experience.

At the core of my development journey lies a deep passion for creating seamless mobile applications. Through personal and academic projects, I've gained hands-on experience with both Android (using Kotlin and Jetpack Compose) and iOS (leveraging Swift, UIKit, and SwiftUI). I have successfully designed and implemented features, integrated REST APIs, and worked with dependency management tools like Swift Package Manager and Hilt. For example, I built an Android app for tracking custom card game scores, where I applied my skills in UI/UX design and API integration to deliver a smooth, engaging experience for users.

In my previous experiences, I've embraced opportunities to innovate and collaborate, always aiming for solutions that are both functional and intuitive. I'm excited by the prospect of contributing to a team that thrives in a fast-paced, dynamic environment, and I am eager to leverage my technical expertise to deliver impactful results. The opportunity to work alongside Rakuten's talented developers, marketers, and designers is an exciting prospect I would love to embrace.

Rakuten's commitment to professional growth and its emphasis on continuous improvement resonate with me deeply. I believe in adopting a mindset of constant learning and always striving to optimize both products and processes. Whether it's through A/B testing or leveraging data-driven metrics to refine features, I am excited about the chance to contribute to Rakuten's goals while expanding my own skills in a collaborative setting.

Thank you for considering my application. I am enthusiastic about the possibility of joining Rakuten and would welcome the opportunity to discuss how I can contribute to your team. I look forward to the next steps.

Sincerely,
Vraj Shah
