Hiring Team
Critical Mass

Subject: Application for **Development Intern**

Dear Hiring Team,

Creating seamless digital experiences that blend technology, creativity, and user experience has always intrigued me. As a passionate and driven software developer, I am excited about the opportunity to join Critical Mass as a Development Intern and contribute to innovative solutions while refining my technical skills.

Currently pursuing my Master of Applied Computer Science at Dalhousie University, I have hands-on experience with HTML, CSS, and JavaScript, along with exposure to frameworks like React. Through academic projects and personal endeavours, I have developed responsive web applications, honed my problem-solving abilities, and collaborated in cross-functional teams. My experience with package managers like npm and build automation tools such as Gulp has further strengthened my development foundation.

What excites me most about this internship is the chance to work alongside talented professionals, learn how technology integrates with UX and creative teams, and collaborate on real-world client projects. The structured mentorship, combined with Critical Mass's commitment to innovation, presents an ideal environment to grow as a developer and contribute meaningfully to projects.

I would love the opportunity to discuss how my skills and passion align with this role. Thank you for your time and consideration.

Sincerely,
Vraj Shah
