Hiring Team
Versaterm

Subject: Application for **Full Stack Developer Co-op Summer 2025**

Dear Hiring Team,

I am excited to apply for the Software Developer Co-op position at Versaterm Public Safety. Your mission to build innovative solutions for police, fire, and EMS agencies resonates deeply with my passion for creating impactful software that enhances community safety.

As a master's student in Applied Computer Science at Dalhousie University, I have cultivated strong skills in full-stack development. During my time as a Software Engineer at Simform Solutions, I contributed to developing scalable Android and iOS applications, enhancing performance by 40% through optimized code structures. I also architected robust backend systems using Spring Boot (Kotlin) and deployed microservices using Kubernetes and Docker, achieving 99.5% system uptime.

Beyond technical expertise, I have a proven ability to troubleshoot complex issues and collaborate effectively within diverse teams. In a recent project, I developed a Kubernetes-based microservices architecture that improved system reliability and communication efficiency across services. My experience with cloud platforms such as AWS and Google Cloud equips me to handle mission-critical systems like those at Versaterm.

The opportunity to contribute to solutions that directly impact first responders and public safety professionals excites me. I am particularly drawn to your focus on innovation and purposeful technology development.

I would welcome the opportunity to bring my technical expertise and problem-solving skills to your dynamic team. Thank you for your time and consideration.

Sincerely,
Vraj Shah
