Dear Hiring Team at Nokia,

Nokia's vision of creating technology that empowers the world to act together resonates deeply with me, especially its commitment to building a more sustainable and inclusive future. As a second-year master's student in Applied Computer Science at Dalhousie University with a strong foundation in Java development and a passion for innovation, I am excited about the opportunity to contribute to Nokia's Network Infrastructure group.

During my two years of professional experience developing native Android and iOS applications, I gained expertise in Java, Kotlin, and Swift, leveraging best practices to deliver high-quality software solutions. My experience with tools like Git, Jenkins, and Docker has equipped me with the technical skills necessary to thrive in a collaborative environment. For instance, I spearheaded a project involving secure data synchronization between mobile devices and cloud storage, integrating PKI-based authentication to enhance security—a challenge that mirrors the responsibilities outlined in this role.

What excites me most about this opportunity is Nokia's emphasis on innovation and teamwork. The prospect of working on NSP platform features—analysing requirements, preparing design documentation, and ensuring robust implementation—aligns perfectly with my problem-solving mindset and eagerness to learn. I am particularly drawn to the opportunity to explore technologies like Kubernetes and Helm Charts while contributing to Nokia's mission of connecting people and advancing telecom networks.

Beyond my technical skills, I bring a proactive and collaborative attitude. Whether mentoring undergraduate students as a teaching assistant or participating in team hackathons, I have consistently demonstrated a commitment to fostering inclusive and supportive environments. Nokia's dedication to employee well-being and diversity, as recognized by its numerous accolades, makes me even more eager to contribute to this thriving ecosystem.

I would be honoured to bring my skills and passion for technology to Nokia, helping drive innovation while furthering my growth as an engineer. Thank you for considering my application, and I look forward to the possibility of discussing how I can contribute to your team.

Best regards,
Vraj Shah
