Hiring Team

PUMA

Subject: Application for **Full Stack Developer - Intern (Summer 2025)**

Dear Hiring Team,

Climate change is one of the most pressing challenges of our time, and technology has the power to drive meaningful change. The opportunity to contribute to PUMA Inc.'s mission of optimizing energy usage and driving sustainability excites me, and I would love to bring my experience in full-stack development to your team.

With a strong background in backend and full-stack development, I have worked extensively with .NET, SQL Server, and MVC architecture. During my time at Simform Solutions, I developed and optimized RESTful APIs using Spring Boot and Kotlin, leading to a 40% reduction in response times for high-traffic applications. Additionally, I optimized complex SQL queries, improving database efficiency and reducing execution times by 30%. My experience with cloud technologies, including Azure Functions and Azure SQL Database, has enabled me to develop scalable and efficient applications in cloud environments. Furthermore, my ability to investigate, document, and resolve software issues ensures the reliability and performance of the applications I work on.

Beyond technical expertise, I thrive in collaborative environments, working closely with cross-functional teams to design and implement impactful solutions. My experience with agile workflows, JIRA, and CI/CD pipelines has allowed me to contribute effectively to dynamic development teams. I am eager to apply my skills to PUMA's platform and work alongside professionals who are passionate about sustainability and energy efficiency.

I would welcome the opportunity to discuss how my skills and experiences align with this role. Thank you for your time and consideration—I look forward to the possibility of contributing to PUMA Inc.'s mission.

Sincerely,

Vraj Shah
