Hiring Team
NetApp

Subject: Application for Software Development Engineer Co-op

Dear NetApp Hiring Team,

I'm excited to apply for the Software Engineer Co-op position at NetApp. With two years of hands-on experience in backend and full-stack development, I have honed my skills in designing scalable solutions and collaborating within Agile teams. The opportunity to contribute to NetApp's mission of pushing technological boundaries aligns perfectly with my passion for innovation and problem-solving.

In my previous role at Simform Solutions, I designed and implemented backend services using Kotlin and Spring Boot, achieving a 40% boost in system efficiency. I also contributed to automated test development, increasing test coverage by 25% and ensuring robust software releases. My experience debugging complex production issues and collaborating across teams has given me a strong foundation for tackling mission-critical software challenges—a core aspect of NetApp's StorageGRID initiatives.

What excites me most about this role is the opportunity to work within a team that prioritizes cutting-edge technology and employee growth. I thrive in dynamic environments where innovation and teamwork drive results, and I look forward to applying my technical skills and curiosity to deliver impactful solutions as part of NetApp's engineering team.

Thank you for considering my application. I would love to discuss how my skills and enthusiasm align with NetApp's mission. I am available for an interview at your convenience and look forward to the opportunity to contribute to your exciting projects.

Looking forward to hearing from you.

Sincerely,
Vraj Shah
